

People born in the European Economic Area (EEA) living in FIFE

Demographic and Census Analysis

This analysis focuses on residents based on their country of birth as the 2011 Census did not include a question on nationality. It should be noted that people born abroad may later acquire British nationality.

EEA countries include EU member countries at March 2011 (excluding the UK in this data) and Norway, Iceland and Liechtenstein. Within the EEA area there is free movement of people, goods, services and capital in the European Single Market.

Key points

- In the 2011 Census, 2.5% (9,200 people) of Fife's population was born in a country in the EEA.
- Net migration to Fife from overseas has been mostly positive over the last 12 years. Most recently in 2015/16 there was a net gain of 1,000 people from overseas.
- In 2011, a higher proportion of the EEA-born population in Fife was of working age (16-64 years) (80%; 7,400 people), compared with 65% of its overall population.
- Fife is projected to have an ageing population over the next 25 years, with a projected increase of 52% for those aged 65 or over. In contrast, the working age population (aged 16-64 years) is projected to fall by 8% between 2014 and 2039.
- In 2011, a higher proportion of EEA-born residents of Fife aged 16 and over were in employment (63%) compared with the total population aged 16 and over of the council area (56%).
- The proportion of EEA-born residents of Fife aged 16-74 with a degree level qualification in 2011 was 43% (3,400 people). The proportion of all people aged 16-74 in the council area with a degree level qualification was lower at 25%.

Number of EEA-born residents

This analysis focuses on residents based on their country of birth as the 2011 Census did not include a question on nationality. It should be noted that people born abroad may later acquire British nationality.

According to the 2011 Census, 2.5% (9,200 people) of Fife's population was born in the EEA. The corresponding proportion for the whole of Scotland was 3.0%.

Age profile of EEA-born residents

In 2011, over half (80%) of EEA-born residents (7,400 people) were aged 16-64, compared with 65% of the whole Fife population. Only 10% of EEA migrants (950) were aged 65 years or over, compared with 18% for the whole population of Fife.

Migration trends

The migration estimates at local level do not allow the overseas component of migration to be broken down into individual countries or groups of countries. The charts start from 2003/04 as the Treaty of Accession came into force in 2003 followed by an enlargement of the EU in 2004.

Over the past 12 years, Fife has generally experienced positive net migration from overseas. In 2015/16 there was a net gain of 1,000 people from overseas compared with 90 people in 2003/04.

Net migration from within Scotland has decreased over the last 12 years from 1,300 people in 2003/04 compared with 120 people in 2015/16.

Population projections

These are trend-based and do not take into account shifts in government policy and other social and economic factors that influence population change, including the UK's decision to leave the EU.

Projected population change over the next 25 years	Fife	Scotland
	+5.4%	+6.6%

Source: Population Projections for Scottish Areas, NRS

Figure 4: Components of projected population change over next 25 years (2014 – 2039)

Source: Population Projections for Scottish areas, National Records of Scotland (NRS)

The projected increase in Fife's population over the next 25 years is attributable to positive net migration from within Scotland, the rest of the UK and overseas.

Changing age structure

The demographic resilience of local areas is affected by the changing age structure of the population and levels of migration. Working age migrants can play an important role in addressing the ageing population.

Fife's population is projected to experience an increase in population aged 65 or over (+52%) between 2014 and 2039, with an increase of 18,500 (58%) for males and 18,400 (47%) for females.

In contrast, the working age population (aged 16-64) is projected to decline by 8% over the next 25 years to 2039, with the biggest decline expected in those aged 50-64 years (down 12%).

Nationalities of National Insurance Number (NINo) allocations to overseas nationals in 2015

A NI^{No} is generally required by any overseas national looking to work or claim benefits / tax credits in the UK, including the self-employed or students working part time.

	Number of nationalities	Top five nationalities (NI ^{No} allocations)
Fife	51	Poland, Romania, Bulgaria, United States, Germany
Scotland	129	Poland, Romania, Spain, Italy, Bulgaria

Economic activity

According to the 2011 Census, a higher proportion of Fife's EEA-born residents aged 16 and over were in employment (63%; 5,200 people) compared with the total population aged 16 and over of the council area (56%). A smaller proportion of EEA residents were economically inactive¹ (32%; 2,700) compared with the total population (39%).

Figure 7: Percentage of people aged 16 and over in each category of economic activity by country of birth, Fife, 2011

Scotland's Census 2011, National Records of Scotland (NRS)

¹ Economic inactive people include: students not seeking employment, people who are retired, and other people not seeking employment (such as those who are long-term sick or disabled or who are looking after a home or family).

Industry of employment

A total of 5,200 EEA-born residents of Fife aged 16-74 were in employment at the time of the 2011 Census. The largest numbers by industrial sector were: Public administration, education and health (1,400 people), Distribution, hotels and restaurants (1,200) and Manufacturing (860).

In 2011, EEA-born people made up 3% of all residents of Fife aged 16-74 in employment. The industrial sector in which this proportion was highest was manufacturing (5%).

National Statistics Socio-economic classification (NS-SeC) and education

In 2011, the proportion of EEA-born residents of Fife aged 16-74 with a degree level qualification (43%) was higher than for people born in Scotland (21%) or in the rest of UK (36%). This qualification gap tended to be greater at lower level occupation categories.

Figure 9: Percentage of people aged 16-74 with a degree level qualification² in each NS-SeC³ category by country of birth, Fife, 2011

Source: Scotland's Census 2011, National Records of Scotland (NRS)

² In the 2011 Census, this is defined as Level 4 and above and includes: Degree, Postgraduate qualifications, Masters, PhD, SVQ level 5 or equivalent; Professional qualifications (for example, teaching, nursing, accountancy); Other Higher Education qualifications not already mentioned (including foreign qualifications).

³ The National Statistics Socio-economic Classification (NS-SeC) provides an indication of socio-economic position based on occupation. It is an Office for National Statistics standard classification.
